If it continues for a long time, the heart and arteries may not function properly. As a result, lisinopril relaxes the blood vessels. This can damage the blood vessels of the brain, heart, and kidneys, resulting in a stroke, heart failure, or kidney failure. This is accounted for by the possible differences in their inactive ingredients such as color and flavor additives, and by the copyright and trademark regulations that does not allow for exact copies of the existing brand-name products.
