Your period will usually begin while you are using these reminder pills. Take one pill every day, no more than 24 hours apart. Your risk increases the older you are and the more you smoke. The FDA has assigned all generic versions of Desogen an "AB" rating, meaning that the generics are as good as the brand-name medication. These products are still generics, even though they seem like brand-name products due to their names. You may need to use back-up birth control, such as condoms or a spermicide, when you first start using Desogen. If you have recently had a baby, wait at least 4 weeks before taking birth control pills. Kristi Monson, PharmD [List of references click here](#). You may get pregnant if you do not take one pill daily. Follow your doctor's instructions. The hormones in Desogen can pass into breast milk and may harm a nursing baby. This is important for insurance purposes it is less likely to be covered, compared to the generics, and for cost purposes it is usually more expensive than the generics. If you miss a reminder pill, throw it away and keep taking one reminder pill per day until the pack is empty. You are even more at risk if you have high blood pressure, diabetes, high cholesterol, or if you are overweight. All generic medications must undergo certain tests to compare them to brand-name medications. [Generic drug availability, manufacturer information, and patent status on Desogen](#).
