The authors show, however, that while physicians have substantially higher average incomes than lawyers, they are also much less likely to buy name-brand headache medicine. These can include codeine as co-codamol, dextromethorphan, methocarbamol, guaifenesin, pseudoephedrine, caffeine, diphenhydramine, chlorpheniramine and phenylephrine. On April 30, another recall was issued for 40 products including liquid infant and children's pain relievers, Tylenol, and Motrin and allergy medications Zyrtec and Benadryl. Apparently the people in the know think the rest of us are blowing it by being stingy and avoiding name-brand yogurt and dried grains. For many other items, including eggs, milk, canned fruits and vegetables, and frozen vegetables, the buying habits of chefs and nonchefs are about the same. Acetaminophen is the most common drug ingredient in America. And for a select few items, including both carbonated and noncarbonated beverages, yogurt, dough products, and dried grains, chefs are actually less likely than the average person to buy generic. Retrieved July 26, Nobody I know thinks advertising works on them or on anyone else. Retrieved from "https: Your prescription label may list the ingredients, the brand name, or both. Prescription medicines that come in generic form may list the ingredients in place of a drug name. Interestingly, a similar logic applies though only partially to food. Retrieved 21 July These events led to the widespread use of tamper resistance packaging of drugs by drug companies, to the passage of a US federal law making tampering a crime, and to legislation in requiring tamper-proof packaging.
