Half of the "patients" asked for oxycodone specifically, and the other half didn't. Even though the risk of addiction to opioid medications is low for chronic pain patients, heightened awareness of abuse and stepped-up law enforcement against misuse has spooked many physicians, making it harder for some pain patients to get the drugs they need. I mean, it really worked. There were signs up all over the office about rules and limitations. The idea that patients' suggestions could influence doctors to prescribe things against their best judgment is especially troubling considering the recent spike in pain pill abuse. Painkillers such as oxycodone also aren't recommended for newly presenting cases of sciatica either, which is what was shown in the videos. Doctors need to monitor their patients to ensure there's no wrongdoing, while patients with a legitimate need want to ensure a continuing supply of meds. Together, the findings suggest that some doctors are easily swayed by patients even when prescribing narcotics that are prone to abuse and that pharmaceutical advertisements targeted at patients may actually affect what doctors prescribe. Physician and Duke behavioral scientist Peter Ubel, who wrote a book about how patients can work with their doctors to make medical decisions, told Business Insider that this shows a problem with medical training. Some physicians ask the patient to sign a contract, which may include things like having pills counted at each visit, keeping with the same doctor to avoid "doctor shopping," and regularly turning up in person. While some patients with severe pain may legitimately require the strongest available treatments, the study shows just how easy it can be for others to get a prescription for unneeded medication. This group of "patients" claiming to have seen ads for the anti-inflammatory drug saw similar results: One video scenario depicted a truck driver complaining of pain. To determine whether patients could influence their doctors' prescribing practices, primary care physicians from six states viewed videos in which professional actors simulated a consultation with a primary care doctor. Some doctors require a narcotics contract. It's a tricky balance. After viewing the video scenarios, the doctors were asked how they would manage the case and what medication they would prescribe. Prescription writing is something that I used to worry so much about in my 3rd year of medical school. I probably killed a whole tree tearing up prescriptions that were wrong. Why did I worry so much about it? Prescription writing was not covered very well at my medical school. And with the amount of material that needs to be. Apr 5, - Wondering whether or not online doctors can prescribe medication like traditional doctors? Learn the answer to this question and more here! Nov 21, - I recently hobbled to the drugstore to pick up painkillers after minor outpatient knee surgery, only to discover that the pharmacist hadn't yet filled the prescription. My doctor's order of 90 generic Percocet exceeded the number my insurer would approve, he said. I left a short time later with a bottle containing a. Oct 12, - The controlled substances included Schedule II pharmaceuticals Percocet and Adderall; Schedule III pharmaceuticals Vicoprofen and Lorcet; and the Schedule IV pharmaceutical Xanax. In the plea agreement, Astin admitted that he knowingly violated federal law by illegally writing prescriptions for Feb 29, - To monitor usage, some doctors require patients to sign narcotics contracts. If a physician is uncomfortable writing prescriptions for opioids. Feb 14, - He's gone so far as to ask the government to not grant him the authority to write prescriptions for powerful opioids such as Percocet, Vicodin, and OxyContin that are classified as having a high potential for abuse 1. Error loading player: No playable sources found. Dr. Nelson Wood talks about patients who. I have found myself having to explain my harsher approach to patients who wonder why, after years of using acetaminophen/oxycodone (Percocet), they now must see pain-management specialists. I tell them that, as in junior high school, a few misbehaving individuals cause everyone to pay a price. I no longer prescribe. Jul 2, - The term misprescribing should be clear and should not include a physician who might follow standards of care and nevertheless write a prescription that .. including morphine, oxycodone (the active ingredient in Percocet, Lorcet, and Oxycontin), hydrocodone (the active ingredient in Vicodin and Lortab).
