Lawmaker wants drug companies to explain how tax law. Crestor is a cholesterol lowering drug in the Statin class of medications. The drug maker contended that any generic label could be dangerous, because a doctor may still prescribe a generic for HoFH, but choose an incorrect dose since the generic labeling would not contain the same information. In a paper issued last fall in the American Journal of Clinical Oncology, a team of researchers argued that drug makers are exploiting loopholes in the Orphan Drug Act that allow them to widen the market for such drugs and distorting the original purpose of the law. Tell us what you think. The company filed its lawsuit over concerns that the FDA will, instead, rely on a decision it made last year allowing generic companies to exclude certain information, so long as a safety risk is not created. Under the Orphan Drug Act, the company was awarded an additional seven years of marketing exclusivity for Crestor, but only for treating this particular rare, or orphan, disease. No answers should be viewed as a diagnosis or recommended treatment for a condition. Events Guide Television Theater Video: One generic, made by Allergan, has been on the market since early May under an agreement settling patent litigation with AstraZeneca. Proposed federal limits to opioid prescriptions draw opposition from. Lawmaker wants drug companies to explain how tax law money will be used. Again, unless you have a good reason to switch to another medication, staying on the Crestor would seem like the logical decision. A spokeswoman for AstraZeneca said the company was disappointed with the court ruling and considering its options. Crestor, a cholesterol-lowering statin, was prescribed. It could continue its lawsuit and seek a reversal of the F. Gabapentin, a drug for nerve pain, and a new target of misuse. You agree to receive occasional updates and special offers for The New York Times's products and services. Newsletter Sign Up Continue reading the main story Please verify you're not a robot by clicking the box. The drug has been on the market for 13 years and was scheduled to lose its patent protection from generics on July 8. Feb 5, - One of the most commonly prescribed brand name drugs in the U.S., the cholesterol-lowering drug Crestor, will become available in a generic version later. But those consumers who pay the entire cost of the drug themselves because they don't have insurance or have a high deductible may not see the. Apr 29, - The FDA is working hard to get first-time generic drugs approved as quickly as possible so patients can have increased access to needed treatments, said Kathleen Uhl, M.D., director of the Office of Generic Drugs in the FDA's Center for Drug Evaluation and Research. The FDA requires that generic. Jul 20, - A recent study in the journal Health Affairs estimated that patients in Medicare Part D typically have a co-payment of \$42 for a Crestor prescription compared with only \$4 for a prescription to a generic version of Lipitor, another statin. In its court filings, AstraZeneca said approval of multiple generics would. A generic version of Crestor has been approved by the FDA. However, this does not mean that the product will necessarily be commercially available - possibly because of drug patents and/or drug exclusivity. The following products are equivalent to Crestor and have been approved by the FDA. Infrequent but serious side effects of Crestor include rhabdomyolysis (muscle damage or destruction) that can lead to acute renal failure and liver damage. Crestor is Get emergency medical help if you have any of these signs of an allergic reaction: hives; difficulty breathing; swelling of your face, lips, tongue, or throat. May 2, - Milligram for milligram, rosuvastatin is the most potent statin that is on the market. It does not have the duration of safety track record that atorvastatin does, so I am not sure it would supplant atorvastatin for many patients, but it is good to have another option for generic potent (high-intensity) statins. Jul 22, - The FDA approved 8 generic versions of the cholesterol-lowering drug Crestor, despite AstraZeneca's attempts to prevent the drugs from being authorized. Jul 5, - What is rosuvastatin, and how does it work (mechanism of action)?; What brand names are available for rosuvastatin? Is rosuvastatin available as a generic drug? Do I need a prescription for rosuvastatin? What are the uses for rosuvastatin? What are the side effects of rosuvastatin? What is the dosage for.
