Talk to your doctor if you have any concerns. Also tell them about any supplements you take. If you are concerned about side effects, discuss the risks and benefits of this medication with your doctor. Many medications can cause side effects. Like other tetracycline antibiotics, doxycycline may cause harm to the developing baby if this medication is taken during pregnancy. Some people may experience side effects other than those listed. An interaction between two medications does not always mean that you must stop taking one of them. The following side effects have been reported by people taking this medication. Finish all of this medication, even if you start to feel better. The contents herein are for informational purposes only. What will it do for me? Ask your doctor if you should be using more than one method of birth control while you are taking this medication.Detailed drug Information for Vibra-Tabs.
